

## BACKGROUND

Based in Port Augusta, South Australia, BRT Steel is a locally owned and operated company that specialises in general and heavy steel fabrication and has been serving the Port Augusta community and surrounding districts for nearly 40 years. First established in 1978, BRT Steel changed ownership in June 2006 when a previous employee became one of the Directors, ensuring the company's service and quality continued.

The team at BRT Steel has an extensive understanding of the harsh and rugged outback environment, with the majority of the company's products being designed and/or modified to withstand these conditions. BRT Steel services Regional South Australia, including the Flinders Ranges and Outback, North and East Pastoral Districts and the Eyre Peninsula.

## SERVICE AND CAPABILITIES

BRT Steel is located on a three acre block adjacent to Spencer Junction Rail Yard in Port Augusta, and work undertaken at BRT Steel is to the highest standard, by using competent and qualified tradespeople. BRT Steel is a niche company that is nimble enough to allow flexibility and growth.

### BRT Steel specialises in:

- General and Heavy Steel Fabrication
- Structural Steel (Small Scale)
- Painting
- Agent for Coregas
- Mobile Maintenance Unit
- Sheet Metal
- Welding
- Aluminium
- Custom/One-off Items\*
- Maintenance and Repairs
- Specialised remote services
- Hard-facing
- Stainless Steel
- Abrasive Blasting
- Steel Sales
- Agent for Universal Initiatives

\*BRT Steel is able to work with clients to design one-off/custom items to suit an array of applications. These can include improving a piece of plant/equipment to withstand a particular environment in which it maybe operating, to designing a new piece of equipment to fulfil a specific task/job. Compliance/rated certificates for purpose built items are easily obtained through an independent engineer, which the company works with.
