

Never Pay Cylinder Rental AGAIN!

D & E CYLINDER SIZES AVAILABLE

Oxygen Gas

Oxygen and acetylene combined produce the hottest flame of any welding gas mixture.

Acetylene Gas

Oxy-acetylene mixtures are suitable for welding, brazing of pipes, and heating/cutting steel.

Argon Gas

Argon is suitable for MIG welding of aluminium and TIG welding of mild steel, stainless steel, low alloy steel and aluminium.

Mig Shielding Gas

MIG shielding gas is suitable for MIG welding of mild steel, stainless steel, low alloy steel and galvanised steel.

D Size

Cylinder filled 2.1m³ of gas (Argon, Mig, Oxygen) & 1.0m³ (Acetylene)

E Size

Cylinder filled 4.9m³ of gas (Argon, Mig, Oxygen) & 3.2m³ (Acetylene)

HOW IT WORKS

- 1 Visit us to purchase acetylene, oxygen, argon or MIG gas.
- 2 When the gas cylinder is empty, simply return the cylinder for a return transaction and take another full cylinder.
- 3 Start the process again. It's that simple!

YOU ONLY PAY FOR THE GAS INSIDE. Never pay cylinder rent AGAIN!
